## **DETAILED ACTION**

### ***Election/Restrictions***

1. I. Claim 1 is drawn to an adjustable safety garment including means for releasably securing inner side edges of a front panel in combination with, a pair of longitudinal straps, classified in class 2 , subclass 102.
- II. Claim 2 is drawn to subcombination of an adjustable side closure for a garment, classified in class 2, subclass 69.
2. The inventions are distinct, each from the other because of the following reasons:  
  
Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for , and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination of Invention I as claimed does not require the particulars of the subcombination as claimed because the safety garment structure includes a rear panel and a pair of front panels having means for releasably securing inner sides edges thereof, means for releasably securing outer side edges of the front and rear panels, in combination, with means for securing a pair of longitudinal straps, with each having retroreflective strip attached thereof, across the front and rear panels between top and bottom edges for patentability. The subcombination of invention II has separate utility,

which is constructed with an adjustable side closure adapted for an article of clothing, that includes means for releasably securing a strap over front and rear panels.

3. A telephone call was made to Mr. John Bunch on July 17, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tejash Patel whose telephone number is (703) 306-9184. The fax phone number for this group is (703) 305-3580.
